Kahoot

Distributed 2 (Fall26)

Questions (10)

1 - True or false

True or false

A grid computing system is built as federation of computer systems.

- True ✓
- False ✗

2 - True or false

True or false

In most cases, same OS is used in nodes for grid computing systems.

- True ✗
- False ✓

3 - True or false

True or false

Cloud computing is similar to grid computing, but is it focused on providing virtualized interface to users.

- True ✓
- False ✗

4 - True or false

True or false

There exists a master node in grid computing.

- True ✗
- False ✓

5 - Quiz

Quiz

Which one of the following is not the advantages of cluster computing?

- Scalability ✗
- Expandability ✗
- Availability ✗
- Heterogeneity ✓

6 - True or false

True or false

In grid computing, Resources are spread over different geographical locations.

- True ✓
- False ✗

7 - True or false

True or false

Grid computing is constrained to a specific building or location.

- True ✗
- False ✓

8 - True or false

True or false

The fabric layer manages communication between nodes.

- True ✗
- False ✓

9 - True or false

True or false

In cloud computing, instead of proving actual hardware, an interface is provided to users to utilize the resources.

- True ✓
- False ✗

10 - Quiz

Quiz

Which one of the following is not the ACID properties of transactions?

Atomic	✗
Consistent	✗
Independent	✓
Durable	✗
