Kahoot

Distributed 3 (Fall26)

Questions (10)

1 - True or false

True or false

In a standard layered architecture, a component at a lower layer can directly invoke a component at an upper layer.

- True ✗
- False ✓

2 - True or false

True or false

A component at a lower layer can receive a down call only from a component in the immediately upper layer.

- True ✗
- False ✓

3 - True or false

True or false

In a layered architecture, the implementation details of a lower layer are exposed to upper layers.

- True ✗
- False ✓

4 - True or false

True or false

Application layering means that the application layer is further divided into multiple levels.

- True ✓
- False ✗

5 - True or false

True or false

Distributed objects communicate with one another through remote procedure calls (RPCs).

- True ✓
- False ✗

6 - True or false

True or false

In a object-based architecture, an object and its interface should reside on the same machine.

- True ✗
- False ✓

7 - Quiz

Quiz

In order for a client to access services provided by a remote object, it needs to have _____ loaded in memory.

- skeleton ✗
- proxy ✓
- interface ✗
- object ✗

8 - True or false

True or false

In the service-oriented architectures, a distributed system is viewed as a composition of many different services.

- True ✓
- False ✗

9 - True or false

True or false

In the RESTful architecture, messages sent to/from a service are self-described.

- True ✓
- False ✗

10 - Quiz

Quiz

Which of the following is not the benefit of the RESTful architecture?

scalability	✗
interoperability	✗
simplicity	✗
Statefulness	✓
